

Build Better, Reduce Costs and Grow Profits

TruFlor was introduced in 2008 to meet or exceed what builders told us they needed and wanted in a sub-floor panel and to provide great value to those builders. TruFlor T&G Sub-Floors have met those expectations and more. TruFlor panels are strong, solid and consistent from panel to panel. They will not delaminate and there are no core voids or knots. TruFlor carries the APA grade stamp assuring built-in performance. Look for the stamp on the face of every panel to be sure it's TruFlor.

Today there are even more great reasons to specify TruFlor.

TruFlor T&G is produced from fiber that comes from responsibly managed forests. Depending on availability, TruFlor may be available with either FSC or SFI Chain of Custody certifications. Our manufacturing operations are located close to markets and TruFlor panels, like all Norbord OSB products, do not contain any added urea-formaldehyde resins.

National Green Building Standard Relevant Sections

Resource Efficiency

- Quality of Construction Materials and Waste 601.2, 601.3, 601.4, & 601.5
- Renewable Materials 606.1, 606.2, & 606.3
- Indigenous Materials 608.1
- Life Cycle Analysis 609.1

Indoor Environmental Quality - 901.4

LEED for Homes Relevant Sections

Materials and Resources (MR) - MR 2: 2.2a, 2.2b, 2.2c

LEED for New Construction and Major Renovations Relevant Sections

Materials and Resources (MR) - MR 5, & MR 7

Indoor Environmental Quality (EQ) - IEQ 4.4

All Norbord OSB products including TruFlor, can help you meet your 'green' building initiatives. At Norbord we recognize that our environment is fundamental to our existence, and that our businesses and the communities where we operate depend on its health.
